Backend Development

- Node.JS
- Express.JS

Databases

- MongoDB
- SQL Server

Version Control

- Git/GitHub

Other Languages

- Python
- PHP
- C++
- C

RELEVANT PROJECTS

Visalab | Visa Issuance Platform

App Link: <https://www.visalab.net/>

- Developed a bilingual visa issuance platform (Arabic & English) with a dynamic Visa Wizard that suggests visa-eligible countries based on the user's nationality.
- Implemented secure user authentication and a personalized dashboard for tracking visa application status.
- Created a full-featured admin control panel for operations: manage countries, visas, pricing, users, and application statuses.
- Focused on performance, scalability, and accessibility using Next.js and modern frontend/backend tools.

Qader - eCommerce | Full Stack Project (Graduation Project)

Source code: <https://github.com/MinaEzz/Qader-MERN-stack-project>

Live demo: <https://qader-shop.onrender.com>

- An eCommerce platform tailored for individuals with disabilities.
- On the frontend technologies used include React.js with hooks, Tailwind CSS for styling.
- Implemented client-side and server-side validations.
- The interface supports dark mode.
- On the backend, Node.js with Express and MongoDB were utilized for data management.

YouTube Clone | Frontend Project (React.JS)

Source code: <https://github.com/MinaEzz/YouTube-clone-react-js>

Live demo: <https://youtube-clone-minaezzat.onrender.com>

- Developed a frontend-only YouTube clone using React, React hooks, and Material UI.
- features video search, display, and playback functionalities, along with channel viewing capabilities.
- Integrated Rapid API for fetching video and channel data.

Twitter Clone | Full Stack Project

Source code: <https://github.com/MinaEzz/Twitter-Clone-App-MERN-project>

Live demo: <https://my-twitter-x-clone.netlify.app>

- Developed a full-stack Twitter clone using the MERN stack.
- Designed a responsive and dynamic user interface with React.js, Tailwind CSS, and Daisy UI.
- Managed server-side data fetching and state management with React Query.
- Built a secure authentication system using JWT and cookies for token storage.
