

Youssif salama

FULL STACK DEVELOPER

 youssifsalama01@gmail.com  01556543218  Cairo  Youssif Salama  Youssif Salama
 Egyptian  Military: exempt

Profile

Full Stack TypeScript Developer with **3 years of experience**, specializing in designing and delivering **secure, scalable** software solutions using **Node.js, Express.js, MongoDB, React, and Next.js**. Successfully developed critical applications, notably an **e-wallet system** and a comprehensive real estate platform with **real-time features**. I am passionate about robust **Backend Architecture**, implementing **Clean Code** principles, and automation to ensure operational efficiency. Additionally, I am an experienced **Mentor and Instructor**, having guided developers in building real-world, practical applications.

Skills

- Html
- Javascript
- Next.js
- Sql, noSql
- Css
- Typescript
- Node.js
- Nest.js
- Tailwind
- React.js
- Express.js
- Firebase

Experience

August 2025 – Present
Cairo, Egypt

Trendlix

Full Stack Developer

- Built scalable full-stack apps with TypeScript, MERN, and Next.js, cutting API latency ~25%. Developed secure REST APIs with OAuth2/JWT and role-based access. Led React/Next.js front-end, real-time WebSocket features, and CI/CD pipelines with Docker, AWS, and GitHub Actions

August 2024 – July 2025

MBD Academy

Backend Instructor

- Designed and delivered MERN Stack backend training for cohorts of 30–36, emphasizing API best practices, secure and maintainable code. Mentored students individually to build production-ready applications, bridging theory and practical, job-ready skills.

Projects

AMF

- Mortgage finance platform enhancing client transparency and workflow tracking; developed full-stack MERN application with secure Node.js/Express APIs, MongoDB & SQL, React/Next.js front-end, real-time dashboards, and third-party financial integrations.

Arabtec

- Developed full-stack MERN applications for Arabtec, implementing secure Node.js/Express APIs with MongoDB and SQL. Built responsive React/Next.js front-end features, project dashboards, and integrated real-time data tools to enhance operational efficiency and client engagement.

Opindoo

- Working on Opindoo, a subsidiary of Alumax specializing in architectural aluminum solutions, improving the website, dashboard, and user experience; tech stack: **MERN (MongoDB, Express.js, React, Node.js)**.

Hatly ↗

Hatly Store (Existing Project)

- Currently improving and redesigning the user interface and dashboard to enhance user experience.
- Maintaining and updating the existing project to ensure performance, stability, and scalability.
- Working across the full stack, handling both frontend (React / Vue / HTML/CSS/JS) and backend (Node.js / PHP / Python) tasks.
- Collaborating with the team to implement continuous updates and modern best practices.

Trendlix ↗

- Digital marketing agency platform enhancing client growth and service delivery; developed full-stack web with scalable Next.js/Node.js architectures, enabling rapid deployment, modular customization, and high-reliability digital solutions.

Lite pay ↗

- Fintech payments platform enabling secure, real-time transactions; developed full-stack MERN applications with Node.js/Express APIs, SQL, React/Next.js front-end, WebSocket transaction monitoring, and integrated third-party payment APIs.

Education

Egypt

GPA: 3.2 / 4.0 , Faculty of Computer Science & Information Technology

Damanhour University

- **Applied core computer science concepts**, including **Algorithms, Data Structures, and Computational Thinking**, to optimize code efficiency and tackle complex technical challenges.
- **Tech Bridge (Graduation Project)**: Social media and job platform with AI assistant for content enhancement and automated moderation; developed full-stack MERN application with AI models for post optimization and inappropriate content detection, achieving a top score of 98/100
